

EXPERIENCE THE THIN BRICK REVOLUTION 

## FREQUENTLY ASKED QUESTIONS

### 1. **What kind of fasteners should be used?**

For exterior application, use a galvanized, stainless steel or coated nail or screw. For interior application, use a standard drywall screw.

### 2. **What is Speedymason made of?**

Speedymason is a composite panel made of polypropylene and fiberglass.

### 3. **What is the warranty?**

Speedymason has a 50 year panel warranty. The panel will not corrode or rust and will not pull off the wall.

### 4. **Has Speedymason been tested?**

Yes, Speedymason has been tested by a third party. View "Speedymason Testing Reports" to see the results.

### 5. **What is the fire rating of Speedymason?**

Speedymason is a class A fire rating when covered with mortar and thin brick. View "Speedymason Testing Reports" to see the results.

### 6. **How is drainage addressed?**

Speedymason has built in dimples on the back side of the panel to address condensation and moisture. For exterior applications, a built in rain screen is an option for areas where 6mm of rain screen is required. Check local building codes for recommendations.

### 7. **What is the sheathing needed behind Speedymason?**

For exterior application, a 5/8" OSB or Plywood exterior grade sheathing is required. For interior applications, Speedymason can be installed over sheetrock.
