SECTION 2. HAZARDS IDENTIFICATION

2.1 **CLASSIFICATION OF THE MIXTURE**

Kindred Outdoors + Surrounds Architectural Substrates are defined by OSHA as an article (under normal conditions, no more than minute or trace amounts of a hazardous chemicals are released and the article does not pose a physical hazard or health risk to employees).

An SDS not is required for articles; however, this SDS is provided to communicate hazards associated where activities related to the Kindred Outdoors + Surrounds Architectural Substrates (cutting, grinding, crushing, drilling or breaking) may result in the release of a hazardous substance in DUST.

GHS Classification(s) for Kindred Outdoors + Surrounds Architectural Substrates according to OSHA Hazard Communication Standard (29 CFR 1910.1200) under normal handling conditions: None

Preparation Date: 04/01/2016

Revision Date: 01/15/2020

GHS Classification(s) for dust generated from cutting, grinding, crushing, drilling or breaking of Kindred Outdoors + Surrounds Architectural Substrates according to OSHA Hazard Communication Standard (29 CFR 1910.1200) under use conditions that may result in the release of hazardous substances:

Skin Corrosion/Irritation, Category 2 (H315)

Eye Damage/Irritation, Category 2 (H319)

Specific Target Organ Toxicity-Repeated Exposure (STOT-RE), Category 1 (H372)

Note: The dust classifications are based on (1) individual ingredient classifications (i.e. Silica Sand [SiO₂], Portland Cement, glass fibers), (2) the final chemical composition of the Kindred Outdoors + Surrounds Architectural Substrates (based on cement chemistry) and (3) the form of the material (dust). Further, the Specific Target Organ Toxicity-Repeat Exposure is a conservative classification based on the potential presence of respirable crystalline silica. Kindred Outdoors + Surrounds Architectural Substrates has not performed analysis for the presence of respirable crystalline silica under these handling conditions.

800.925.1491 www.mykindredliving.com **5** of 11

Measures to protect the environment:

Not applicable; material is not an environmental hazard.

Advice on general occupational hygiene:

Practice good housekeeping. Avoid formation of dust generated from cutting, grinding, crushing, drilling or breaking. Do not breathe dust. Use adequate exhaust ventilation, dust collection and/or water mist to maintain airborne dust concentrations below permissible exposure limits. Respirable crystalline silica dust may be in the air without a visible dust cloud. In case of insufficient ventilation, wear a NIOSH approved respirator for silica dust when using, handling, storing or disposing dust from this product. Do not permit dust to collect on walls, floors, sills, ledges, machinery, or equipment. Maintain and test ventilation and dust collection equipment. Wash or vacuum clothing that has become dusty. Avoid eating, smoking, or drinking while handling the material.
