Because Eldorado Stone replicates natural stone, variations should, and can be expected. Even though colours in this brochure are as close to the actual stone as possible, photographic and printing techniques — and actual viewing conditions — can alter perception of colour. It is recommended to obtain a sample of Eldorado Stone before placing an order.

If you would like more information on prices, availability of stone, the name of your local distributor, or answers to any questions not covered in this brochure, please contact us. We would be happy to assist you with your stone building plans. Detailed installation instructions, specifications, technical information and test data is available upon request or can be found on our website.
